

Post-Test

Name: _____

Date: _____

Instructions: After reviewing the Organ and Tissue Donation and the Hospital Referral Process video, answer the questions below.

1. The federal government mandates that all hospitals refer deaths and imminent deaths to their designated organ procurement organizations.
 - A. True
 - B. False

2. Which clinical triggers require that a referral call be made to LifeNet Health?
 - A. Glasgow Coma Scale of 4 or less in a ventilated patient with suspected neurological insult (check hospital policy)
 - B. Discussion of terminal withdrawal of mechanical and/or pharmacological support
 - C. Anticipated brain death testing
 - D. Any mention of donation by anyone
 - E. All of the above

3. In the event of a death, it is required to make a referral call to the organ procurement organization even if _____.
 - A. The patient has HIV.
 - B. The patient has metastatic lung cancer.
 - C. The patient has Hepatitis C.
 - D. The patient is 96 years old.
 - E. All of the above

4. As defined by LifeNet Health, a timely referral is within _____ minutes of anticipated brain death testing.
 - A. 30
 - B. 45
 - C. 60
 - D. 90

5. If a patient is listed in the computerized state registry (e.g. the patient has either checked yes on their driver's license or is registered under a state site like www.donatelifevirginia.org), this is considered first-person consent that would be honored in a court of law.
 - A. True
 - B. False

(Answer Key) Post-Test

1. The federal government mandates that all hospitals refer deaths and imminent deaths to their designated organ procurement organizations. A. True

2. Which clinical triggers require that a referral call be made to LifeNet Health? E. All of the above
 - Glasgow Coma Scale of 4 or less in a ventilated patient with suspected neurological insult (check hospital policy)
 - Discussion of terminal withdrawal of mechanical and/or pharmacological support
 - Anticipated brain death testing
 - Any mention of donation by anyone

3. In the event of a death, it is required to make a referral call to the organ procurement organization even if _____. E. All of the above
 - The patient has HIV.
 - The patient has metastatic lung cancer.
 - The patient has Hepatitis C.
 - The patient is 96 years old.

4. As defined by LifeNet Health, a timely referral is within _____ minutes of anticipated brain death testing. D. 60

5. If a patient is listed in the computerized state registry (e.g. the patient has either checked yes on their driver's license or is registered under a state site like www.donatelifevirginia.org), this is considered first-person consent that would be honored in a court of law. A. True
